

Certificate of conformity

In a verification audit, the organisation
Risse + Wilke Kaltband GmbH & Co. KG
has developed a compliant calculation methodology
for the product groups

Cold rolled and strip steel

for product-related greenhouse gas balances (Product Carbon Footprint) based on the data from the Stenglingser Weg 46, 58642 Iserlohn site as of December 6, 2024 (CFP Calculation Sales (2024v04).xlsx, version 2024v04) in accordance with the requirements of the standard:

DIN EN ISO 14067

Issue February 2019

The verification was carried out in accordance with the requirements of ISO 14064-3:2020-05.

The accounting tool fulfills all the requirements placed on the accounting system and the determination of greenhouse gas-relevant information for the determination of a complete product carbon footprint according to the cradle-to-gate accounting approach in accordance with the above-mentioned standard. The calculation methodology covers the following life cycle stages:

Raw material extraction, pre-production, upstream transportation, production, storage

The emission factors used for the calculation originate from published information or credible sources. The survey methodology was checked for suitability and plausibility.

The determination of the specific product carbon footprints and the correct application of the calculation methodology is the responsibility of the above-mentioned organization.

The certificate is based on the test report with the number C-24-25193.

Berlin, 19.12.2024

Prof. Dr.-Ing. Jan Uwe Lieback
